SPY GADGET 1

The Academy Code Wheel

Big wheel

Small wheel

1. Ask a grown-up to help you cut out both wheels along the dashed lines.
2. Ask a grown-up to poke a small hole in both centers. Put the small wheel on top of the big wheel and push a brad (a small metal pin with two legs) through both holes.
3. To send a secret message, turn the small wheel so its **A** lines up with the big wheel's **E**. Find each letter of your message on the small wheel and write the big-wheel letter next to it on your paper.
4. To read a message, do it the other way: find each letter on the big wheel and write down the small-wheel letter next to it.

Practice message from Agent Owl (small A lined up with big E):

CSY EVI E VIEP WTC

SPY GADGET 3

My Fingerprint File

Every agent at the Academy has a fingerprint file. Make yours: rub a soft pencil on scrap paper, press one finger on it, then press it in its box (or press the finger on clear tape and stick the tape in the box). Then look at the lines and check the box for its type.

Loop
The lines come in from one side, turn around and go back out the same side.

Swirl
The lines go round and round in circles in the middle, like a whirlpool.

Arch
The lines go from one side to the other and bump up in the middle, like a hill.
